AWRA 2023 SUMMER CONFERENCE

Connecting Land & Water

This conference brings together stakeholders across multiple disciplines and types of organizations and professions to address the design, integration, and implementation of the programs necessary to better connect land and water planning and policy.

Topics covered include:
Land and water aspects of water supply, water demand management, stormwater management, wastewater treatment, community planning and design, conservation, and integrated “one water” approaches.

July 17-19 | Denver, CO

With a focus on the relationships among water resources management, utility operations, and land use planning and design, attendees will come away with a new understanding and strengthened personal networking connections across the disciplines and professions critical to water and community sustainability.
